Profile

Software Engineer with 2 years of experience building scalable enterprise applications using C#, ASP.NET Core Web API, and SQL Server.
Strong expertise in backend development, API design, and database performance optimization, with experience in frontend technologies (Angular, HTML, CSS) for end-to-end feature delivery.
Hands-on experience in production environments, resolving critical issues and improving system performance in healthcare (LIS) applications.

Professional Experience

Software Engineer, *Bot Bridge Technologies, Chennai* 11/2025 – Present

- Designed and developed **RESTful APIs** using ASP.NET Core for enterprise healthcare systems
- Built and optimized **complex SQL queries and stored procedures**, improving performance by **~40%**
- Handled **production issues**, reducing downtime and improving system reliability
- Managed database operations across **production and development environments**
- Developed and integrated **UI screens using Angular/HTML/CSS** for multiple modules
- Collaborated with cross-functional teams for **end-to-end feature delivery and deployments.**

Software Trainee, *Bot Bridge Technologies, Chennai* 10/2024 – 10/2025

- Developed backend modules using **C# and Entity Framework**
- Designed and implemented **stored procedures, views, and database logic**
- Assisted in debugging, testing, and resolving issues in development and QA
- Supported frontend integration and basic UI development for internal modules

Technical Skills

Languages & Backend: C#, ASP.NET Core, Web API, Entity Framework, RESTful Services
Database: SQL Server, T-SQL, Stored Procedures, Query Optimization, Indexing, Execution Plans
Frontend (Basic Exposure): HTML, CSS, JavaScript, TypeScript, Angular
Tools & Platforms: Visual Studio, VS Code, SSMS, Git, GitHub

Key Projects

Laboratory Information Management System (LIMS)

- Developed modules for **patient management, sample tracking, reporting, and analytics**
- Designed scalable database supporting **high-volume transactions**
- Optimized performance using indexing and execution plan analysis
- Contributed to both **backend APIs and UI workflows**

Self Registration Portal

- Built web-based portal integrated with backend APIs
- Implemented validation and ensured secure data flow between UI and backend

Enterprise API Integration

- Developed APIs enabling communication across multiple systems
- Optimized large data payload handling and reduced response time
